

Project Purpose

Sediment has built up in Rose's Pond, which is detrimental to the pond inhabitants. The dam is in need of reconstruction due to settling and tree root growth. The pond banks need additional rocks for compaction and erosion prevention.

Project Description

This project will renovate Rose's Pond, including dredging sediment to restore it to its original depth. The spillway and dam will also be replaced while incorporating stormwater best management practices to improve water quality and recreational access.

Location

87th Street Parkway & Lackman Road

Designer

Olsson Associates

Contractor

Crosslands Heavy Contractors

Timeline

Start Date: December 2011

Estimated Completion Date: June 2012

Total Cost

\$1,589,937

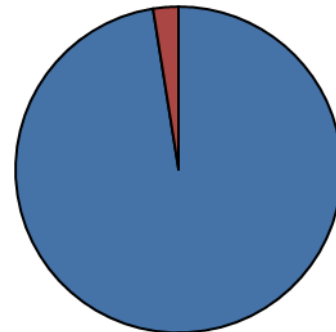

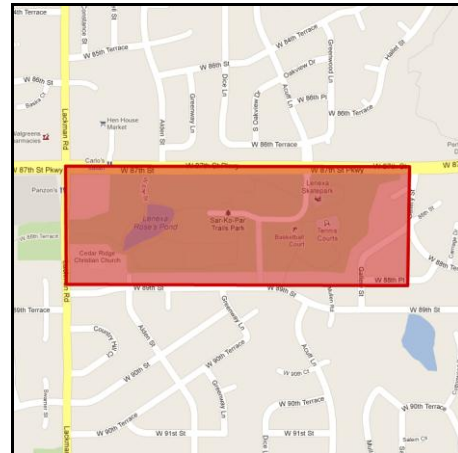

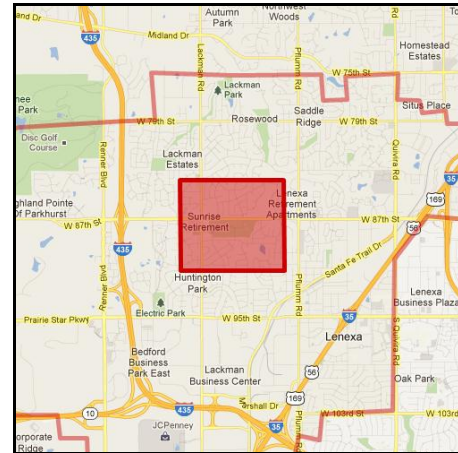

Funding Sources

City: \$1,549,537 (98%)

- 3/8-cent sales tax

Other: \$40,000 (2%)

- State grants
